

Wall Instructions

Easy-link: cut along lines to make walls inter-linkable

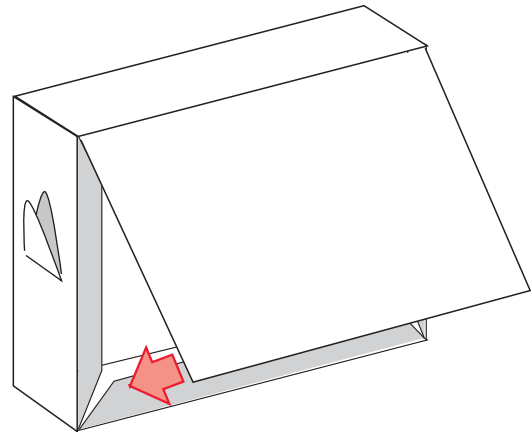

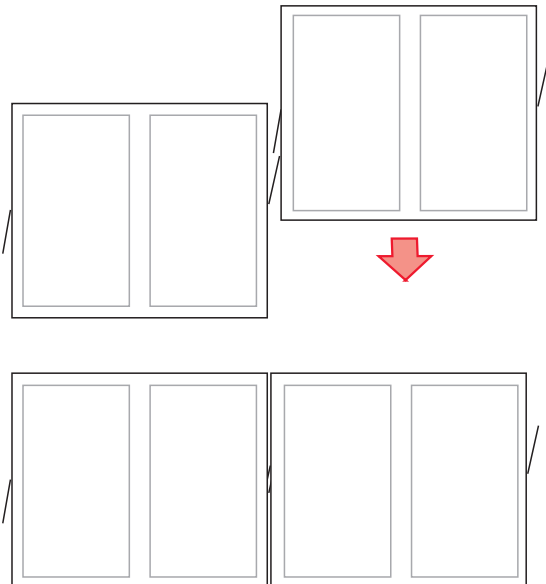

1. Print on 150g-200g paper, cut out preferably with a paper knife and steel ruler. Do not forget the links.

2. Trace the fold lines from the back with either a hard sharp pencil or preferably a fine ball pen. Apply a little pressure so the paper is compressed. It will then fold up quite easily.

3. Fold and glue like this. Before the glue is dry, remove any bend or tilt by standing the wall on a flat surface. Bend it carefully until all lines are straight.

4. Use the links to connect walls, doors and corner links.

Note: to create scenery that is most authentic, most patterns and textures have been extracted from screen shots of the original SW V film, using Photoshop to enhance and reshape them or to adjust their perspective. If you like my creation, please feel free to drop me a line at Eli.Kurtz@gmx.net.
